

# Ecoflam

## COMPANY PROFILE

Customized burner  
solutions for any type  
of application

# HERITAGE

**Ecoflam** is founded in Castelfranco Veneto, near Venice. Ecoflam was born as a burner manufacturer, then extended its business even to wall hung and floorstanding boilers becoming a pioneer in the study of condensing boilers Technology.

The **Ecoflam** gnome, symbol of the company appears for the first time bringing intrinsic meanings of Ecology and Energy Saving from northern European culture.

**Ecoflam** moves its premises to Resana where the headquarters of the company still is.

Opening of the **GREEN** (Gruppo Ricerca Ecoflam ENergia Laboratorio in Piombino Dese. Now **Ecoflam** disposes of a new Research and Develop centre of 8000 m2 which will soon become the heart of testing thanks to its 5 different Laboratories.

# SINCE 1973

a global leader  
in the manufacture  
of combustion  
technologies

**Ecoflam** counts three production plants (Resana, Conselve, Reggio Emilia), two International branches (UK and Spain), has a total turnover of 52M€ and produces yearly 110.000 Burners and 22.000 Thermal units.

**Ariston Thermo Group** acquires the 33% of the company.

**Ariston Thermo Group** totally acquires **Ecoflam**

**Ecoflam Bruciatori** is now implemented into the Burners Division of the Ariston Group and can benefit of the Group's synergies, i.e. common Lab testing, sharing of new developments and new Technologies.

**Ecoflam** celebrates its **40<sup>th</sup>** anniversary

**Ecoflam** extends its range up to 34 MW with a renewed version of its duoblock burners

# APPLICATIONS

## STANDARD BURNERS

The flexibility of Ecoflam solutions allows the manufacturing of highly customized products covering a range from 12 kW to 34 MW, available in monoblock and duoblock architecture, able to work with any fuel or mixture of fuels.

Three laboratories, for more than 2000 m<sup>2</sup> dedicated to the development of new solutions and combustion technologies, are working to extend the offer of low NO<sub>x</sub> and ultra low NO<sub>x</sub> burners.

## SPECIAL VERSIONS

Ecoflam is renowned for its ability to conceive and build flexible products and to propose customized solutions for any type of application. Successful and satisfied customers demonstrate throughout the years that Ecoflam is able to meet their requests offering a wide range of special products capable to satisfy even the most difficult ones.

## OEM SOLUTIONS

The great ability in developing tailor-made solutions has made Ecoflam a worldwide benchmark for the OEM market. This was only possible thanks to the ability to create value-added partnerships that start from the concept of the project and go through the development of solutions that meet every customer's requirement. The result is a product that always matches perfectly the requirements of customers and markets and satisfy even the most recent regulations in terms of pollutant emissions, such as the ErP Regulation

Working to meet  
the challenges  
of the future

## VALUES

## RESEARCH AND DEVELOPMENT

Following a philosophy of continuous improving, the R&D Laboratory is constantly working to produce better results, such as the reduced NO<sub>x</sub> level emissions.

The development of new advanced combustion technologies allows to propose solutions in respect of the most stringent environmental regulations and to create the perfect condition to face the new upcoming market requests, such as Ultra Low NO<sub>x</sub> products for ErP regulation.

## **PROFESSIONAL ADVICE**

Ability to design state-of-the-art burners, manage demands of products for specific applications, ability to solve problems in real time are just some of the characteristics of our technicians and engineers.

But not only: Ecoflam has a worldwide network of service technicians able to support the installation, the commissioning and the periodic maintenance activities of the burner.

## **CUSTOMER-ORIENTED APPROACH**

Our products are designed, developed and manufactured in Italy, combining quality, reliability and high performance. All these features are necessary for the end-user satisfaction, which has always been the prime target for Ecoflam.

Reaching this outcome throughout its extensive worldwide network of distributors and customers has always been a challenging task for Ecoflam, which was achieved only by developing a close and personalized relationship with each customer, always taking into account the needs and distinctive characteristics of each individual market.

# PRODUCTS

Thanks to 45 years of experience in the design and production of burners, Ecoflam offers a full range of blown air pressure jet burners covering an extremely wide range of power, from small products for residential heating applications to high power burners dedicated to the industrial segment.

Ecoflam burners are renowned worldwide for providing high efficiency and reliable operation with significant energy savings and feature extreme ease of installation, maintenance and flexible boiler-burner matching.

Thanks to its strong expertise in customization, Ecoflam boasts many different solutions for a wide range of applications.

The flexibility of the Ecoflam range allows to grant quick response to each customer request, even the most demanding in term of technical specifications.

## SERVICE

A wide range  
of services  
to grant  
reliable and  
economical  
installations

## Commissioning and Maintenance

ECOFLAM service technicians, together with their Official Service Partners, are able like no other in performing all the activities concerning the commissioning of the burners and the after-sale maintenance of the installation. The professional services of Ecoflam can perfectly perform this service for any type of installation to keep it always in operation without any worries.

## International service network

ECOFLAM can count on a worldwide network of well-trained local engineers and technicians who have the expertise to offer a wide range of services to suit any specific requirement. This service network gives to each customer the guarantee to receive support for any type of ECOFLAM product, assuring high reliability and well-functioning installations.

## The Burner Academy

In order to respond to the needs of our customers we created the Burner Academy, a real school where the knowhow of our

technicians is diffused to our partners. We provide the opportunity for boiler room personnel, operators and engineers to attend a series of training sessions carried out on our test bench by highly qualified instructors.

## Spare Parts

Spare parts have always had a great importance inside the ECOFLAM world. Considering the high amount of parts involved in every single product, some of these parts might naturally need to be substituted. ECOFLAM can count on a international network offering original spare parts in order to guarantee the highest quality, reliability and safe continued operation of the appliance.

# Sustainable products and solutions to reduce consumption and protect the environment

**All over the world, Ariston Thermo is synonymous with comfort, energy efficiency and respect for the environment, thanks to its high efficiency products, its plants in compliance with the most advanced production standards and excellent pre- and after-sales customer support services.**

The Group now has a leadership position in the global thermic comfort market for domestic, commercial and industrial spaces.
